Dukane Seacom Commences Production Deliveries For DK180 Airframe Mounted Low Frequency Underwater Locator Beacon

Extended Range & Long Operational Life Will Assist in Recovery Efforts

SARASOTA, Fla., September 27, 2017 – Dukane Seacom (a HEICO Company, NYSE: HEI, HEI.A) commenced production deliveries for its newest underwater locator beacon product, the DK180. The DK180 has gained significant market interest both as a forward fit (new platforms) and retrofit (on existing in-service platforms). To-date, DK180 backlog exceeds 500 units, with deliveries scheduled through mid-2018.

The DK180 Low Frequency Beacon builds on Dukane Seacom's industry leading portfolio of underwater locator beacons for aerospace and military/defense platforms. The DK180 is certified to FAA TSO-C200a and TSO-C142a, and provides common installation and maintenance practices as existing Dukane Seacom 90-day recorder mounted underwater locator beacons found on most commercial, business, and military aircraft.

The DK180 uses the same battery as Dukane Seacom's 90-day (DK120/90, DK120/90-1) recorder mounted beacons. This battery has an install-base exceeding 60,000 units, and has proven to be the safest, most reliable primary lithium ion battery for aerospace ULB applications. This battery commonality will simplify inventory and maintenance processes for airlines, fleet operators, and MROs.

"The DK180 builds on the 40 plus year legacy of the Dukane Seacom underwater locator beacon product line, which have proven to be the most reliable, easiest to maintain, and have the safest battery chemistry in the industry," said Anish Patel, President of Dukane Seacom. "We are thankful for the airframe manufacturers and aircraft operators who continue to place their trust in our product."

With over 40 years of industry experience, Dukane Seacom has the largest install base of underwater locator beacons (commercial, military, and business jets) with over 100,000 ULB installed on aircraft. This unmatched reliability and expertise is what airlines/operators put their trust in when purchasing Dukane Seacom products.

About Dukane Seacom

Sarasota, FL-based Dukane Seacom Inc. is the world's leading supplier of underwater acoustic locator beacons for the aviation and marine markets. Dukane Seacom beacons are installed on the global commercial and business jet aircraft fleets, military fixed wing and rotary aircraft, as well as maritime and specialty underwater applications. About HEICO

HEICO Corporation is engaged primarily in certain niche segments of the aviation, defense, space, medical, telecommunications and electronics industries through its Hollywood, Florida-based Flight Support Group and its Miami, Florida-based Electronic Technologies Group. HEICO's customers include a majority of the world's airlines and overhaul shops as well as numerous defense and space contractors and military agencies worldwide, in addition to medical, telecommunications and electronics equipment manufacturers. For more information about HEICO, please visit our website at http://www.heico.com.

The Company has two classes of common stock traded on the NYSE. Both classes, the Class A Common Stock (HEI.A) and the Common Stock (HEI), are virtually identical in all economic respects. The only difference between the share classes is the voting rights. The Class A Common Stock (HEI.A) receives 1/10 vote per share and the Common Stock (HEI) receives one vote per share. The stock symbols for HEICO's two classes of common stock on most web sites are HEI.A and HEI. However, some web sites change HEICO's Class A Common Stock symbol (HEI.A) to HEI/A or HEIa.
